STRUCTURAL PANELS INC.
INSULATED PANEL BUILDING SYSTEMS

CANNABIS

State of the art indoor Cannabis Grow Facilities need a sealed, smooth, reflective, and highly durable food-grade surface throughout the grow chambers, the entry vestibules, and often beyond, into the processing and storage areas of the building envelope. **QuickLiner**™ easily fastens to existing structures, protecting your walls and ceilings from corrosive elements while creating a clean, bright environment.

BUILD IT TO LAST

PROTECTS WALLS & CEILING

INDUSTRY-LEADING DURABILITY

REDUCED MAINTENANCE

HIGH SANITATION STANDARDS

QUICKLINER

1. **SNAPTRIM™ EDGES** No caulking or sealant is required. Finish quickly and professionally at any wall location. Easily replace damaged or vandalized panels without removing and re-installation.

2. **DURABLE PVC** Our heavy duty panels are extruded from an industry leading grade of PVC. Available in 18" widths and lengths between 8' and 20'.

3. **TONGUE & GROOVE** Wide interlocking tongue and groove joint hides fasteners and allow a quick and simple installation.

4. **NAILING FLANGE** Panels can be fastened to any structure and are typically supported every 16" to 24". Our design accommodates expansion and contraction in varied temperatures.

BUILT TO LAST | BUILDS QUICKLY | FOOD SAFE | CLASS A FIRE RATED | CORROSION RESISTANT

GMP COMPLIANCE

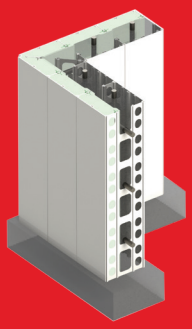

QuickLiner™ certified food-safe virgin PVC panels are specially engineered to ensure GMP compliance. Panels and seams can be power washed or washed with a variety of cleaning solutions and contain a unique locking seam design to ensure the performance and cleanliness of the joint.

CLEAN ROOM CERTIFIED

Clean rooms built with Octaform **QuickLiner**™ and combined with an appropriately sized HEPA filtration system will exceed cleanroom standards.

FORMWORK

BUILDING FROM THE GROUND UP?
Choose our versatile stay-in-place PVC formwork system to form and protect your walls in one step!
